An Enhancement Request has been logged.

- What is the general process for Enhancement Requests?
- Is there a timeline associated with an enhancement?

Product Management periodically evaluates Enhancement Requests for *possible* inclusion in a future major release.

Their possible inclusion (or not), prioritization, and timing are determined by market needs and the functional and development complexity level.

Enhancements that are completed will be noted in the Release Notes of major releases or service packs, which will be available in the relevant Product documentation set available [here](#).

For details on receiving notifications about releases and updates, refer to the Release Announcements article, which outlines how to do so via the [Tungsten Automation Community](#), and bookmark it as explained in the "[Follow or bookmark a discussion](#)" section.

Applies to

Product	Version	Build	Environment	Hardware
All products				

References

Please refer to the latest "Tungsten Automation Policy on Feature Requests" section of the *Tungsten Automation Software Lifecycle Policy* document, which can be found by browsing to the Lifecycle Policies and End of Support Dates article.
