

Error message Invalid license key for product Global Enhancement Package generated when running /rse/us* namespace programs or transactions

000037047 | How To | Last updated 2026-09-16 | Process Director, Process Director Accounts Payable

Issue

Error message "Invalid license key for product Global Enhancement Package" is generated when running /rse/us* namespace programs or transactions

Solution

Open a support case to request a replacement license for the Global Enhancement Package.

NOTE: We recommend that you activate all GEP license keys in production so that production refreshes do not inadvertently wipe out test licenses.
