

SAP Flagged Potential Performance Issues on COCKPIT 1 eInvoicing for S4HANA Migration

000045484 | Troubleshooting | Last updated 2026-09-08 | Process Director Accounts Payable

ISSUE

The SAP team conducted a performance scan as part of the S/4 HANA migration. Several performance issues and improvement opportunities were detected and flagged for specific transactions and programs, specifically /COCKPIT/1 eInvoice.

We are assessing the best approach to minimize risks during this migration. We are reviewing ABAP code improvements based on SAP's recommendations. We would appreciate your assistance and insights on this matter.

CAUSE

Repeated identical SELECT SINGLE calls that create unnecessary database loads during high-volume invoice processing.

SOLUTION

Fix is available with pre-correction RSPDN2260865 or web application release.

RSPDN2260865 is available with Versions: 2027.1, 2026.1.2, 2025.1.4, 7.12.6

You can follow release information using this [link](#).
