

Hide new E-invoices fields from "Other Selection Fields" in PDAP

000045926 | Troubleshooting | Last updated 2026-09-03

ISSUE

There are two problems with new fields for E-invoices in the /COCKPIT/1 other selection fields from 7.12 PD AP Version:

1. Actually, they don't need these fields, and they cannot be customized via transaction /COCKPIT/C19. They don't have the fields maintained in the customizing, but nevertheless the fields appear in the selection screen.
2. It seems the fields do not have a translation into german language. If PD is used in german language, the fields show up with empty labels.

SOLUTION

It is a bug. Please import correction RSPDN2189941
