

System Benchmark Evaluate Response process missing

000045984 | General Info | Last updated 2026-09-11 | TotalAgility

ISSUE

I wanted to test the new Knowledge Discovery benchmark functionality on 2026.3.

However, when I create a new Benchmark test I received an error saying "Process does not exist or is not active at this time"

I noticed that there is a process under System Category, called System Benchmark Evaluate Response. This process does not exist on our other environment.

SOLUTION

The following package is in the installation media of 2026.3:

KB Benchmark Package.zip

\\TungstenTotalAgility-2026.3\\TotalAgilityInstall\\Agility.Server.Web\\Packages

When I checked the content of the package it contains the System Benchmark Evaluate Response process.

>>Import the package
